

CR-KP4-W/CR-KP4-B 8-Button Keypad Controller

The CR-KP4 is a versatile and useful product for both system integrators and smart home users alike. This 8-button keypad can send commands to any Ethernet controlled or relay controllable device in your system. The buttons are suitable for all environments and PoE (Power over Ethernet) support allows for creative placement of the keypad within your space without needing to be concerned about keeping it near a live power source.

Additionally, the integrated clock and calendar based scheduling feature allows you to trigger macros to control devices within your installation at a specific time, or on a recurring schedule. The sophisticated appearance makes this keypad an elegant and decorative addition to your living or working space.
